

Privacy Policy for Black Swan: War Impact Map

Effective date: July 17, 2026

1. Introduction

This Privacy Policy explains how **Black Swan: War Impact Map** ("Black Swan," the "App," "we," "us," or "our") handles information when you use the App.

Black Swan is published under the developer name **GY Signal Studio** and is operated by **Yurii Gevtsi**, Ukraine.

Contact email:

gysignalstudio.dev@gmail.com

By using the App, you acknowledge the practices described in this Privacy Policy.

2. Overview

Black Swan is an independent informational application that presents publicly reported information concerning the effects of Russia's war inside Russia and related regions.

The App:

- does not require registration or creation of a user account;
- does not ask users to provide their name, email address, telephone number, or postal address;
- does not request access to precise device location;
- does not request access to contacts, photographs, videos, files, camera, or microphone;
- does not process donations;
- may display advertisements through Google AdMob;
- may offer an optional Google Play purchase to remove advertisements;
- contains links to external websites and third-party sources.

Although we do not directly request personal information, third-party services integrated into the App may automatically process certain device and usage information.

3. Information We Do Not Directly Collect

GY Signal Studio does not operate a user-registration database for Black Swan.

We do not directly collect or store:

- user names;
- account passwords;
- telephone numbers;
- personal email addresses;
- precise GPS location;

- contact lists;
- photographs or videos;
- microphone recordings;
- private messages;
- payment-card details;
- health information;
- biometric information.

If a user voluntarily contacts us by email, we receive the information included in that communication.

4. Information Processed Through Advertising Services

The App may use **Google AdMob** and related Google advertising technologies.

Depending on the user's location, device settings, consent choices, Google configuration, and applicable law, Google and its advertising partners may process information such as:

- IP address;
- approximate location derived from the IP address;
- advertising identifiers or other device identifiers;
- device type, operating system, language, and technical configuration;
- App interactions and advertising interactions;
- ad impressions, clicks, and frequency information;
- diagnostic information;
- crash-related or performance information;
- fraud-prevention and security signals.

This information may be used for purposes including:

- delivering advertisements;
- selecting personalised or non-personalised advertisements, where permitted;
- measuring advertising performance;
- limiting how often an advertisement is shown;
- analytics and reporting;
- fraud prevention;
- security and compliance.

Google and participating advertising partners may act as independent controllers or processors of information under their own privacy policies and legal obligations.

Google's privacy information is available through Google's Privacy & Terms pages.

5. Consent and Privacy Choices

Where required by applicable law, the App uses the **Google User Messaging Platform**, or a comparable Google consent solution, to request and manage privacy choices.

The consent message may allow users to:

- consent to personalised advertising;
- choose non-personalised or limited advertising where available;

- manage advertising partners or purposes;
- withdraw or modify previously submitted choices.

The App includes, where required, a **Privacy Choices** entry in its settings or legal menu.

Consent information may be requested or refreshed when the App starts so that the current legal and consent requirements can be applied.

Withdrawal of consent does not affect the lawfulness of processing performed before consent was withdrawn.

Some limited data processing may remain necessary for security, fraud prevention, technical ad delivery, frequency capping, or legal compliance even where personalised advertising is not selected.

6. Google Play Purchases

The App may offer an optional one-time purchase, such as **Remove Ads**, through Google Play.

Payments are processed by Google Play.

GY Signal Studio does not receive or store:

- full payment-card numbers;
- card security codes;
- bank-account credentials;
- Google Account passwords.

We may receive limited transaction information from Google Play, such as:

- product identifier;
- purchase status;
- purchase token;
- transaction confirmation;
- entitlement status;
- country or currency information where supplied by Google.

This information is used only to:

- verify the purchase;
- provide the purchased feature;
- restore the purchase;
- prevent fraud;
- comply with legal or accounting obligations.

Purchases, refunds, and payment methods are also governed by Google Play's applicable terms and policies.

7. Email Communications

If you contact us at gysignalstudio.dev@gmail.com, we may receive:

- your email address;
- your display name;
- the contents of your message;
- files or screenshots you voluntarily attach;
- technical information you voluntarily provide.

We use this information to:

- respond to your request;
- investigate reported errors;
- process privacy-related requests;
- address legal or security concerns;
- improve the App.

Do not send sensitive personal information unless it is necessary for your request.

8. External Links

The App contains links to:

- news organisations;
- official government or military statements;
- public databases;
- reference resources;
- social-media posts;
- charitable organisations;
- other independent websites.

When you open an external link, you leave the App and interact directly with the third-party service.

Third-party websites may collect information under their own privacy policies. GY Signal Studio does not control and is not responsible for their privacy, security, cookies, content, or data-processing practices.

9. Links Supporting Ukraine

The App may contain external links to organisations or initiatives supporting Ukraine.

GY Signal Studio:

- does not collect donations inside the App;
- does not process donation payments;
- does not receive users' payment-card details;
- does not guarantee the availability or operation of external donation services;
- does not provide digital goods or App benefits in exchange for external donations.

Any donation is a separate interaction between the user and the relevant third-party organisation.

10. Legal Bases for Processing

Where the General Data Protection Regulation, UK GDPR, or similar legislation applies, information may be processed on the following legal bases:

Consent

Consent may be used for:

- personalised advertising;
- storage or access of advertising identifiers;
- certain analytics or advertising-partner activities;
- other processing requiring user consent.

Legitimate interests

Limited processing may be based on legitimate interests such as:

- maintaining App security;
- preventing advertising fraud;
- diagnosing technical failures;
- protecting the App and its users;
- responding to user requests;
- maintaining basic service functionality.

Contractual necessity

Purchase-related information may be processed where necessary to provide an optional paid feature purchased through Google Play.

Legal obligations

Information may be processed or retained where necessary to comply with applicable laws, lawful government requests, accounting obligations, or dispute-resolution requirements.

11. Sharing of Information

We do not sell personal information.

Information may be processed or shared in the following circumstances:

Service providers

Information may be processed by providers supporting:

- advertising;
- consent management;
- payment processing;
- App distribution;
- technical infrastructure;

- security;
- diagnostics.

These providers may include Google AdMob, Google Play, Google Play Services, and Google User Messaging Platform.

Legal and safety reasons

Information may be disclosed when reasonably necessary to:

- comply with applicable law;
- respond to valid legal process;
- protect users or the public;
- investigate fraud or security incidents;
- enforce our rights;
- defend against legal claims.

Business changes

If the App or its assets are transferred, reorganised, or acquired, relevant information may be transferred subject to applicable legal safeguards.

12. Data Retention

GY Signal Studio retains direct email correspondence only for as long as reasonably necessary to:

- respond to the communication;
- investigate reported problems;
- maintain security records;
- resolve disputes;
- comply with legal obligations.

Information processed by Google or other third parties is retained according to their respective policies, account settings, consent choices, and legal obligations.

Because Black Swan does not provide user accounts, we generally do not maintain a user profile that can be deleted as a single account record.

13. International Data Transfers

Google and other service providers may process information in countries other than the user's country of residence.

Where required, international transfers may be protected through mechanisms such as:

- adequacy decisions;
- standard contractual clauses;
- contractual safeguards;
- technical and organisational security measures.

Third-party providers are responsible for describing their own transfer mechanisms in their respective privacy documentation.

14. User Rights

Depending on applicable law and location, users may have rights including:

- access to personal information;
- correction of inaccurate information;
- deletion of information;
- restriction of processing;
- objection to certain processing;
- withdrawal of consent;
- data portability;
- submission of a complaint to a competent data-protection authority.

Advertising and consent preferences should first be managed through the App's **Privacy Choices** function, where available, and through the device or Google Account advertising settings.

For information directly held by GY Signal Studio, submit a request to:

gysignalstudio.dev@gmail.com

We may need sufficient information to verify and process a request. Because the App does not provide user accounts, we may be unable to identify information connected to a particular individual unless that individual previously contacted us directly.

15. Security

We take reasonable technical and organisational measures appropriate to the limited information we directly process.

However, no internet transmission, device, advertising system, email system, or storage method can be guaranteed to be completely secure.

Users are responsible for maintaining the security of their device, Google Account, and network connection.

16. Children

Black Swan concerns armed conflict, sanctions, infrastructure incidents, economic pressure, and related geopolitical subjects.

The App is not designed for children and is intended for an adult audience.

We do not knowingly collect personal information directly from children through user accounts or registration forms.

Parents and guardians should supervise minors' access to content concerning armed conflict and current geopolitical events.

17. Changes to This Privacy Policy

We may update this Privacy Policy when:

- App functionality changes;
- new SDKs or service providers are introduced;
- advertising or purchasing functionality changes;
- legal or regulatory requirements change;
- data-processing practices change.

The revised policy will display an updated effective date.

Material changes may also be communicated through the App or its Google Play listing where appropriate.

18. Contact and Data Controller

For purposes of applicable data-protection law, the operator responsible for information directly handled by the App is:

GY Signal Studio

Operated by **Yurii Gevtsi**

Country: **Ukraine**

Email: **gysignalstudio.dev@gmail.com**

The personal telephone number of the operator is not used as a general public support channel. Google Play or competent authorities may receive verified contact information separately where required by their procedures or applicable law.

19. Language

This Privacy Policy may be translated into other languages.

Where legally permitted and where there is a conflict between translations, the English version should be used as the primary reference unless mandatory local law requires otherwise.
